TITLE : IMAGING METHOD AND APPARATUS,
 AND MEMORY MEDIUM

ABSTRACT : PROBLEM TO BE SOLVED: To request access from a PDA, or the like, even in the case of a high volume data on a WWW server such that it can be visually confirmed surely.

SOLUTION: An access request command is issued from a PDA 812 through infrared communication and a digital copy machine 801 receiving that access request command access a data on a WWW server 810 and prints the data thus accessed. In an imaging apparatus having a function for printing a data obtained by accessing a WWW(World Wide Web) through a network comprises a radio communication means, and an access control means for acquiring a data on the WWW server by accessing it based on an access request command including at least address information, e.g. URL(User Resource Locator) received through the radio communication means.
